

Gourav Sharma

Product & UI/UX Designer

gouravsharma.ux@gmail.com • [+91 6200204324](tel:+916200204324) • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Product Designer with 3.5+ years of experience crafting intuitive and scalable digital experiences across SaaS platforms, mobile apps, and web interfaces. Skilled in user research, prototyping, interaction design, and design systems. Led end-to-end design for high-impact features across complex products. Bachelor of Design, National Institute of Fashion Technology, Kolkata.

EDUCATION

National Institute of Fashion Technology

Bachelor of Design — CGPA: 8.2 / 10

Kolkata, India

2018 – 2022

WORK EXPERIENCE

Omniful

Product Designer 2

Gurgaon, Haryana

June 2024 – Present

- Lead UX for TMS and delivery app modules — vehicle management, trip flows, proof-of-delivery, and payment collection — streamlining multi-step driver workflows into single, guided actions.
- Designed end-to-end Stock on Wheel module across admin and driver apps, enabling mobile inventory dispatch with real-time visibility into vehicle-held stock.
- Built demand forecasting and redesigned order creation in WMS/OMS, replacing manual planning with a guided, data-backed flow.
- Revamped company website and landing pages, aligning visual language across every growth surface into one cohesive brand system.
- Maintain and scale a shared UI library spanning TMS, OMS, WMS, and web, leading a unified design system adopted across all product lines.

Edgistify

Product Designer 1

Thane, Maharashtra

Sep 2023 – June 2024

- Managed the product lifecycle end-to-end, aligning cross-functional teams with client requirements for successful implementation.
- Designed a B2B model for EdgeOS and built a Route Optimization web app for Bisleri, turning a manual dispatch process into a guided planning flow.
- Designed a Web-Based Picker App to optimize warehouse processes and reduce pick-path errors.

Executive UI/UX Designer

July 2022 – Sep 2023

- Redesigned the company website to showcase its vision, business, and services, improving user experience and engagement.
- Conducted user research to inform the redesign strategy; developed wireframes, prototypes, and mockups aligned to business objectives.
- Enhanced B2C features in EdgeOS, applying user-centric design principles to improve usability.

SKILLS & TOOLS

PRACTICE

User Research, Usability Testing, Design Systems, SaaS Platform Design, Prototyping, Wireframing, Visual Design, Mobile App & Website Design, Information Architecture
